WORK EXPERIENCE

Giftaway   Makati, Philippines
Frontend Developer   Aug 2023 – Jan 2025

- Contributed extensively to the company's UI component library, implementing reusable and accessible components based on the design system to streamline development across projects.
- Wrote comprehensive unit tests and component tests, ensuring robust and maintainable code for the UI library.
- Partnered with the backend team to integrate APIs and ensure seamless functionality across applications.
- Collaborated closely with the design team to translate wireframes and mockups into responsive, user-friendly interfaces.
- Developed and maintained multiple microsites for different bank companies, delivering tailored user experiences for promotional events.
- Added and configured Google Analytics for a high-traffic site, enabling real-time user behavior tracking and data-driven improvements.
- Designed and optimized CI/CD pipelines using GitHub Actions, automating deployment processes for staging and production environments.
- Mentored newly hired developers, providing guidance on best practices, code reviews, and team workflows.
- Built and maintained a client-facing web application for their HR benefit programs, serving multiple clients with customizable features.
- Designed and developed internal tools and UI components for company use, enhancing operational efficiency and employee productivity.

Accenture   Manila, Philippines
Associate Software Engineer   Jun 2022 – July 2023

- Provided application maintenance for Oracle E-Business Suite Procure to Pay process.
- Worked with Oracle EBS modules including Purchasing, Account Payables, and iExpenses.
- Ensured compliance with service level agreements for clients.
- Troubleshoot and resolve software issues, working collaboratively with cross-functional teams to improve system performance and user experience.
- Created functional requirements specification documents for new changes to the instance.
- Tested solutions, patches, and data fixes provided by Oracle before moving them to the Production environment.
- Identified and resolved corrupt orphan transaction records to maintain data integrity.
